

Ersa miniature soldering irons

The **MINOR S (5 W)** and **MINI-TIP S (6 W)** miniature soldering irons with ERSADUR tips are suitable for the finest-detailed soldering work on micro-circuits.

The MINOR S can be operated with a 6 V transformer or a 6 V battery. Besides electronics, the MINOR S is also used in watch repair, in the photographic industry and in dental technology.

The MINI-TIP S can be operated with a 12 V battery.

Ersa micro/universal soldering irons

The Ersa **MULTI-TIP** series covers a wide range of applications. It stands out by its low weight and compact design (short distance between soldering tip and the handle's front part). The handle stays relatively cool while soldering.

The MULTI-TIP is available for **15 W** and **25 W** and suitable for both micro-soldering joints and medium-sized soldering, as on distributor strips. Longlife and industrially tested PTC heating elements and internally heated soldering tips provide high efficiency and fast heat supply.

The **TIP 260** is also heated in this especially efficient way. **16 W** power and slim design make this soldering iron an ideal aid when working on electronic assemblies in places difficult to access.

Ersa universal soldering irons

Wide range of soldering tips!

Thanks to its large range of tips, the Ersa **MULTI-PRO** is the ideal soldering iron when great flexibility is required. It has a heat-resistant connecting cable. Internally heated tips provide a high level of efficiency.

Ersa 30 S, the best selling and most tried and tested universal soldering iron, is known the world over for its sturdiness and longevity. It can be used in a variety of ways for soldering tasks in handicrafts, service and hobbies. Delivery includes a practical, easy to mount rubber stick-on support disk. The Ersa 30 S is available with **30 W** and **40 W**.
