

SOS LIGHT

THE PORTABLE TEMPORARY EMERGENCY BEACON

**COMPACT
AND HANDY**

**RECHARGEABLE
BATTERY WITH USB-C**

**MAGNETIC
BASE**

Regular maintenance plays an important role in eliminating workplace hazards. Thanks to SOS Light reporting worker's presence during maintenance operations will become a simple, fast and effective operation!

SOS LIGHT

MAXIMISE SAFETY DURING MAINTENANCE OPERATIONS

TEMPORARY SIGNALLING DURING MAINTENANCE OPERATIONS

The new SOS Light is a removable LED light, easy to apply and remove on metal surfaces and equipped with a rechargeable battery via a USB C-type cable.

- Available in green, amber, white, red and with arrow or cross pictograms
- Rechargeable battery providing 5 hours of continuous use
- Practical on/off button for quick switching on and off

TEMPORARY SIGNALLING OF OBSTACLES OR INACCESSIBLE AREAS

The new SOS Light provides clear indication of areas that are temporarily inaccessible, indicating a safe alternative route not affected by maintenance.

TEMPORARY SIGNALLING ON MOVING LOADS

SOS Light can make a difference in contexts where temporary signalling of objects or loads to be moved is required.

In night work environments such as harbours, the SOS Light can be applied to containers when they are about to be handled, making it easier to spot them even if they are at height and in poor visibility conditions.

CODES

74751	Amber color
74752	Red color
74753	Green color
