DESCRIZIONE / DESCRIPTION / DESCRIPTION / DESCRIPCIÓN / BESCHREIBUNG

Our outdoor safe can be securely mounted on the wall, near your door or wherever you like. It is equipped with a sturdy 4-digit combination lock (with protective cover) which allows access to your keys by those to whom you have given the code. The key safe allows you to store various keys safely (house, car, mailbox, B&B...). Internal dimensions: 63x86x30mm. External dimensions: 94x 116x38mm. This wall-mounted key safe is made of steel alloy: it is very resistant to impacts and opening attempts (hammers, saws, forcing...), as well as weatherproof. Ideal for keeping a spare key for your home or car. Also convenient for storing an emergency key, for the B&B, the cleaning lady etc... Waterproof and Weatherproof: The surface of the safe is waterproof, corrosion-resistant and weatherproof. Easy to install: The cassette comes with clear instructions and complete mounting kit. Possibility of resetting the 4-digit combination: you can reset and change the password whenever you want, but don't lock the safe door until you have tested the combination!
