DATI TECNICI / SPECIFICATION / CARACTÉRISTIQUES / CARACTERISTICAS / SPEZIFIKATIONEN

Power supply:	220V AC
Power supply included:	YES
Type of power supply:	INTERNAL DRIVER
Batteries included:	INCLUDED
Battery (type):	CR2032
Battery technology:	LITHIUM-ION
Range (m):	150
Materials:	PLASTIC - ABS
Insulation class:	II
Colour:	WHITE
Protection degree (IP):	IP44
Plug:	Type C/EF - 2 pin (Europlug/FR-DE Hybrid WITHOUT EARTH)
Guarantee:	2 YEARS
Product width (mm):	170
Product depth (mm):	70
Product height (mm):	75
Net weight kg):	0,19
Quantity of batteries used:	1
Replaceable battery:	YES
Numero melodie:	

DESCRIZIONE / DESCRIPTION / DESCRIPTION / DESCRIPCIÓN / BESCHREIBUNG

[150 meters free field range] The distance between transmitter and receiver is up to 150 meters. The transmission is 433MHz, enough radio range to install the wireless doorbell anywhere in your home, ensuring you don't miss any visitors or deliveries. [36 ringtones and 4 volume levels] You can choose your favorite ringtone from 36 different melodies.... All beautiful!. Possibility to adjust the volume on 4 levels. [With flashing RGB LED] When the doorbell button is pressed, in addition to hearing the ringtone, a colored LED will flash around the receiver (you can choose between various colors), which is very visible especially in the dark. Also convenient for people who can't hear well or if the TV is on! You can also choose whether to leave the ringtone + light signal or just the ringtone or just the light signal. [Easy Installation] Simply insert the receivers into electrical outlets (indoor exclusively). The doorbell can be attached to the door frame with screws or attached with double-sided tapes. In addition to the convenient name holder, the doorbell also has a red light that indicates to the visitor that his call is being transmitted. Finally, the bell is resistant to water splashes: it is therefore suitable for being on the gate pillar or under the veranda. [No interference] pairing the doorbell and receivers is very simple and does not require any skills. Above all, this combination guarantees that there will be no frequency disturbances with other wireless devices nearby.
