Product height (mm):	120
Net weight kg):	0,119
parole chiavi:	lampada uv, anti zanzare, zanzariera elettrica, pest repeller

DESCRIZIONE / DESCRIPTION / DESCRIPTION / DESCRIPCIÓN / BESCHREIBUNG

Super effective: our electric mosquito killer works with a high intensity ultraviolet LED bulb that attracts all annoying flying insects into the device. It kills them instantly when they come into contact with the powerful high voltage metal grids. Effective for an area up to 12 m². It is therefore perfect for a bedroom. No chemicals or odours. Our electric mosquito killer does not use any chemicals. It also produces no smoke, no smell, no spray. It is totally free of toxic substances and of any form of pollution. It is also absolutely harmless to the human body and pets. Perfect for the bedroom. Easy to use and clean: just install the electric mosquito killer in a dry place and plug it into the socket; dead insects are collected in the bottom tray, which can be easily removed for disposal and cleaning; easy to clean with the small brush supplied. Safe and durable - our electric mosquito net is designed in hyper-resistant ABS plastic. It is conceived to avoid any contact with the metal grids. The 4x1W LED lamps have a lifespan of 8,000 hours and cannot be replaced. Quality and service: Velamp is an Italian company that has been operating on the Italian market since 1906.
