Technical Data Sheet

CODE 61039

NORDIK AIR DESIGN 180-29 TRASPARENTE

Reversible ceiling fans

DESCRIPTION

- Nominal diameter of blades: 1800 mm
- Cups, motor cover and ceiling rod casing made of transparent thermoplastic resin (Polycarbonate).
- Ball bearings external rotor motor. Reversible rotation.
- Rod made of electrogalvanized steel, length 170 mm.
- Lighting system based on LED technology (color temperature 3.500 °K), 3 different lighting modes available:
 - home: this option activates 60 LED placed on the central area of the ceiling light. The entire underneath area is covered by a diffused and uniform light (maximum surface 30 m²).
 - work ("dark light"): the option activates 50 LED placed on the outer ring of the ceiling light. A small area is illuminated avoiding risks of glare.
 - mixed: all 110 LED are activated; the entire area is illuminated. The light intensity can be adjusted to achieve the required intensity illumination.
- Remote control (RF technology); supplied with the product, allows to:
 - Switch ON/OFF the product;
 - Set the rotation speed (5 speeds available);
 - Set the rotation sense (cw or ccw);
 - Switch ON/OFF the light and set 3 alternative lighting modes;
 - Adjust the light intensity (5 levels available);
 - Set the delayed shutdown of the ceiling fan (timer).
- Safety cable to prevent any risk of fall in case of improper installation.
